

London

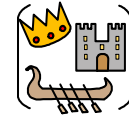

Transport

Museum

shows

the

history

of

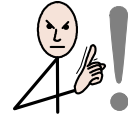

transport

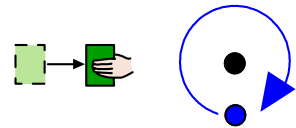

in

London.

Transport is very important in cities.

People need to move around easily.

London's first omnibus

The first bus in London was the omnibus.

1 horse pulled the omnibus.

The omnibus was very expensive.

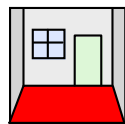

Horse power

Buses

with

2

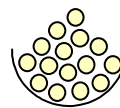

floors

could

carry

lots

of

people.

2 horses

pulled

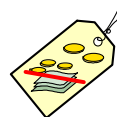

this bus.

This bus

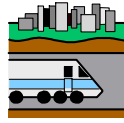

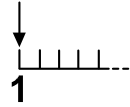

was

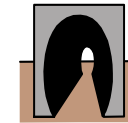

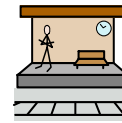

cheap to use.

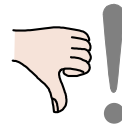

First underground

The first underground trains were steam trains.

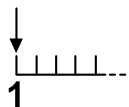

It was very smoky and smelly in the stations and tunnels.

It was horrible for people.

First electric Tube

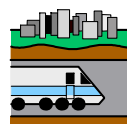

The

first

electric

underground trains

didn't have

windows.

People

couldn't see

where

to

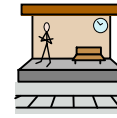

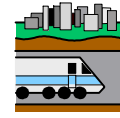

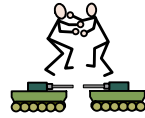

get off.

Sheltering underground

In the war, people slept in underground stations.

It was very safe.

The stations were very crowded.

Early motor power

Motor buses

and

electric

trams

were

better

than

horse buses

and

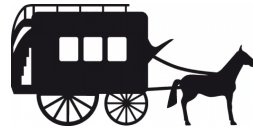

horse trams.

People

stopped

using

horse buses

and

horse trams.

This model shows how people travel around London.

Routemaster

People

like

the

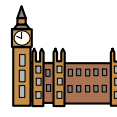

red

bus.

It is a symbol of London.

Taxi

Taxi

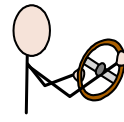

drivers

know

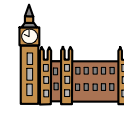

how

to

drive

across

London.

Taxi

drivers

have to

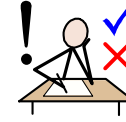

do

a

very

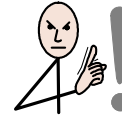

hard

test.

The future

The environment is very important.

We might need to use cars less.

How will you travel in the future?
